The life science
business of Merck
operates as
MilliporeSigma in
the U.S. and Canada.

Sigma-Aldrich®
Lab & Production Materials

Cell Signaling

- Monoclonal and polyclonal primary antibodies focused on cell biology, neurobiology and molecular biology.
- Secondary antibodies and Immunochemicals, blocking agents, buffers and substrates.

Biochemistry—Specialties

- Extensive portfolio of highly active proteins and peptides from neuropeptides and hormones, to receptors, cytokines, growth factors and kinases

Molecular Biology—Specialties

- Products for cloning and expressing genes, sequence cDNA: LHD, NAA, Electrophoresis, Plant Biotechnology, Reagents, Sequencing, GEA, C&E

Assays

- Great variety of ELISA kits for cell culture supernatants, plasma and serum samples, cell membrane labelling, nuclei isolation kits

Protein Assays

- Proteomics research with Panorama protein arrays, Protease Inhibitors, Proteins, Protein Chromatography , Recombinant Protein Expression & Purification

Antibiotics

- Variety of antibiotics such as penicillin G, amoxicillin, cefaclor, polymyxin B

Antibodies

- Western blotting antibodies, small pack antibodies, beta actin antibodies

Roche

- High quality bio reagents for molecular biology, PCR/ Amplification, Enzymes, Inhibitors, cell proliferation
