## **NEW PRODUCTS**

### **Volatile PFAS:** **Native Perfluoroalkanesulfonamides and** **Perfluoroalkanesulfonamidoethanols**

In response to numerous customer requests, we have added 3 additional certified reference standards of volatile perfluoroalkyl and polyfluoroalkyl substances (PFAS) to our inventory (**FPeSA-I**, **N-EtFBSA-M**, and **N-EtFBSE-M**). Our efforts to offer comprehensive product lines to meet your analytical needs will remain ongoing and we appreciate your input as our synthetic chemists work to generate the standards that are most frequently requested.
